

Agenda: Magnet Meeting 11/12/2007

- **Agree on common key volumes for the solenoid construction:**
 - I propose to take the attached document as a starting point of the discussion. I hope that we can also agree on a default design for the yoke based on Jost's drawings including the prolongation in upstream direction. Else we spend endless manpower discussing forever and don't get anywhere at all. We need to have an answer for the TB next day!
 - Length: basically unknown
- **Discuss pros and cons of Yuri's proposal of a shorter coil.**
 - Length: 20min with discussion
- **Coil and Yoke considerations from Renzo and Andrea B.**
 - Length: 30min with discussion
- **Design criteria and the Integration Document**
 - Length: basically unknown
- **All other topics**
