

Which Information for Review Process?

- Brief overview of topic and fundamental physics impact
- Other experiments in field (now and at runtime)
- Superiority of PANDA (at runtime)
- Run plan projection: Prerequisites for measurement
 - Which p -bar momentum/energy?
 - High luminosity or high precision run mode?
 - Special requirements for reconstruction quality?
 - Signatures to trigger on?
 - Minimum of (integrated) luminosity or runtime?
 - Opportunities for simultaneous measurements?
