

# What sections are under development.

- Aluminium cables.
- Experimental requirements.
- Signal cables.
- Aluminium prototypes
- Power cables.

# What has been done.

- Folded layout.
- Straight layout.
- Aluminium deposition.
- Aluminium lamination.
- Technology selection.

# What has been written.

- Cable issue introduction.
- Experimental environment requests.
- Signal cable suggestion.
- Aluminium cable prototypes.
- Power cable suggestion.

# What is in progress.

- Static parameters measurements.
- Dynamic parameters measurements.
- SLVS transceiver test.
- Wire bonding tests.
- Radiation tests for insulator.

# What has to be done.

- Actual evaluation of needed lines.
- Production for longer prototypes.
- Tests with new drivers.
- Selection for power cables.
- Evaluation for power regulators.
